25	133	139	138	137	138	138

Note: The following criteria is to be used when man. grades are not required or when roadway slope &/or driveway grade differs from the typical section shown:

- (1) Min. length of V.C. for crest = 0.45 A
- (2) Min. length of V.C. for sag = 0.75 A
- (3) Max. change in grades is 12% of crest and 11% of sags for any combination of grades without vertical curve.
